

System(s)-on-a-Chip:
Changes in SoC Design Methodology II

June 2015
Study Number: **SC103-15**

Table of Contents

Table of Contents	v
List of Tables	vi
List of Figures	vii
Executive Overview	1
Report Objective	4
Market Perspective.....	5
State of the Market Report... a Reality Check	7
Dispelling the Myths.....	8
Design Productivity Gap.....	12
Mask Set Costs – An Area for Concern.....	18
Disaggregation of the Semiconductor Industry	19
Metamaterials Start to Impact the Market	21
Growth in the Number of SIP Blocks per Design.....	24
Die Area Partitioning	27
Current Complex SoC Market Trends and Drivers: 2015	33
Changes in the SoC Design methodology	43
Definitions of SoC	45
Typical SoC Design	53
A New Twist in SoC Development	54
Worldwide ASIC Market Forecast	62
Worldwide Application Specific Standard Product Market Forecast.....	65
Worldwide SoC Market Forecast.....	69
SoC Market Unit Shipments	69
SoC Market Revenue Forecast.....	72
Product and Market Expectations	90
Open Issues for the Industry	94

List of Tables

Table 1. Dispelling the SoC Myths.....	8
Table 2. Dispelling the Same Myths Ten Years Later.....	9
Table 3. SWOTS Chart for SoC Methodology.....	10
Table 4: Evolving List of Metamaterial Candidates.....	22
Table 5: Potential Areas of Nanotechnology / Metamaterials Influence.....	23
Table 6: History and Forecast of Complex SoC Silicon Design Costs.....	35
Table 7: History and Forecast of Complex SoC Software Design Costs.....	36
Table 8. Worldwide ASIC Revenue Forecast by Type.....	63
Table 9. Worldwide ASSP Revenue Forecast by Type.....	66
Table 10: Unadjusted SoC Unit Shipments Reported to IP Vendors by IP Category.....	69
Table 11: List of CPU, DSP and Graphics IP Vendors.....	70
Table 12: Adjusted SoC Unit Shipments Collected by IP Vendors.....	71
Table 13. Worldwide SoC Revenue Forecast by Type.....	72

List of Figures

Figure 1: Design Productivity Gap.....	13
Figure 2: Altering the Design Productivity Gap.....	14
Figure 3: Cadence Design Systems System Level Design Approach.....	15
Figure 4: Synopsys System Level Design Approach	16
Figure 5: Rising Mask Set Costs	18
Figure 6: Outsourcing Drives New Markets.....	20
Figure 7: Growth in the Number of SIP Blocks per Design.....	24
Figure 8: Rise in the Average Number of Different Types of SIP Blocks	25
Figure 9: Average Number of IP Blocks per SoC Type.....	26
Figure 10: Advanced Performance Multicore SoC Die Area Partitioning 1999-2019	28
Figure 11: Value Multicore SoC Die Area Partitioning 1999-2019	29
Figure 12: Basic SoC Die Area Partitioning 1999-2019	30
Figure 13: Total Average Die Area Partitioning 1999-2019.....	31
Figure 14: Escalating Cost of Complex 1 st Time Effort SoC Design.....	33
Figure 15: Comparison of Silicon and Software Design Costs	34
Figure 16: Overlap of Silicon, Software and IP Integration Efforts in Complex SoCs	37
Figure 17: Design Re-Spin Climate is Increasing	38
Figure 18: Design Costs for Adv. Perf. Multicore SoC Moderate over Time	40
Figure 19: Design Costs for Value Multicore SoC Moderate Over Time	41
Figure 20: Design Costs for Basic SoC Moderate Over Time	42
Figure 21: Revised Complexity Definitions for SoCs.....	44
Figure 22. ASIC Market Evolution	46
Figure 23. Semico Definition of “Advanced Performance Multicore” SoC	47
Figure 24. Semico Definition of “Value Multi-core” SoC	48
Figure 25. Semico Definition of “Basic” SoC.....	50
Figure 26. Typical SoC Design	53
Figure 27. Yesterdays’ Typical SoC Design	56
